

Enhance security with WinGuard

Comprehensive Physical Security Information
Management (PSIM) solutions for TAPA members

PSIM & WinGuard for TAPA members

As a TAPA member, you understand the importance of meeting the highest security standards—especially in logistics. That's why MPL (Monitoring Alarm Registration Center) offers a solution tailored to TAPA members. With WinGuard as a Service, our cloud-based PSIM (Physical Security Information Management) solution, you retain full control over your alarms, integrate multiple security systems, and seamlessly forward notifications to another control room when necessary. This ensures fast, reliable, and uninterrupted alarm processing, fully in line with TAPA guidelines.

Scalable, modular total solution

MPL forms an exceptionally strong combination with WinGuard, letting you benefit from the best of both worlds. WinGuard is best-in-class in Physical Security Information Management (PSIM), while MPL has been setting the benchmark in security and safety for over 20 years.

As the only certified WinGuard Control Room Partner, we offer you the option to connect services to our advanced alarm and communication center. This gives you 24/7 support, a fail-safe security management system, and complete oversight of all data within your transport and warehouse facilities. The result: an all-in-one solution for security, sustainability, and comfort. With modular services that can be tailored precisely to what you need to optimally manage your transport and warehouse environment. Always custom-made.

The Benefits of MPL's Smart Data

MPL's smart data: Know exactly what's happening in your distribution environment and how it can be improved.

- Existing and new systems in one cloud platform
- Total solution for distribution and logistics management
- Easily manage and optimize processes via one data dashboard
- Lower total cost of ownership for your distribution centers
- Greater safety, comfort, and sustainability

MPL's solution for TAPA: Winguard as a Service

As a TAPA-certified Monitoring Alarm Registration Center, MPL offers a comprehensive solution for alarm management in logistics. Winguard as a Service provides the flexibility to centrally monitor and control your security infrastructure.

With Winguard as a Service, you can effortlessly forward alarm notifications to other control rooms. This ensures uninterrupted alarm processing—even during peak times or when your primary control room is temporarily at reduced capacity. Delays and data loss become a thing of the past, and every incident receives immediate attention.

Key benefits for TAPA members:

- Real-time alarm processing: Respond immediately to incidents, minimizing risks.
- Flexibility and scalability: Easily integrate new or existing systems and scale capacity as needed.
- Reliability and continuity: Our 24/7 infrastructure is ISO 27001-certified and meets EN50518.
- Optimal compliance: Stay fully aligned with TAPA guidelines and other crucial security standards.

Forward thinking. Acting today.

For over 20 years, MPL has been setting the standard in safety, sustainability, and comfort for multiple sectors. With forward-looking vision and a hands-on mentality, we're already making tomorrow possible today. Our three pillars for a smart collaboration are:

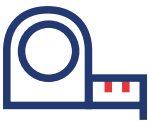

Smart

We're at the forefront of digital security. Partners and customers alike can rely on our know-how, cost-effective solutions, and the latest technology.

Convenient

We deliver total solutions that take the burden off your shoulders. Easily integrated with both existing and new systems, providing straightforward insights into all data.

Tailor-made

We offer tailor-made solutions for every security or facility management need. With modular services and systems that meet specific requirements.

To support you, we also provide project management. We oversee systems and optimize the right processes. Through continual improvements and data updates, we ensure optimal safety.
